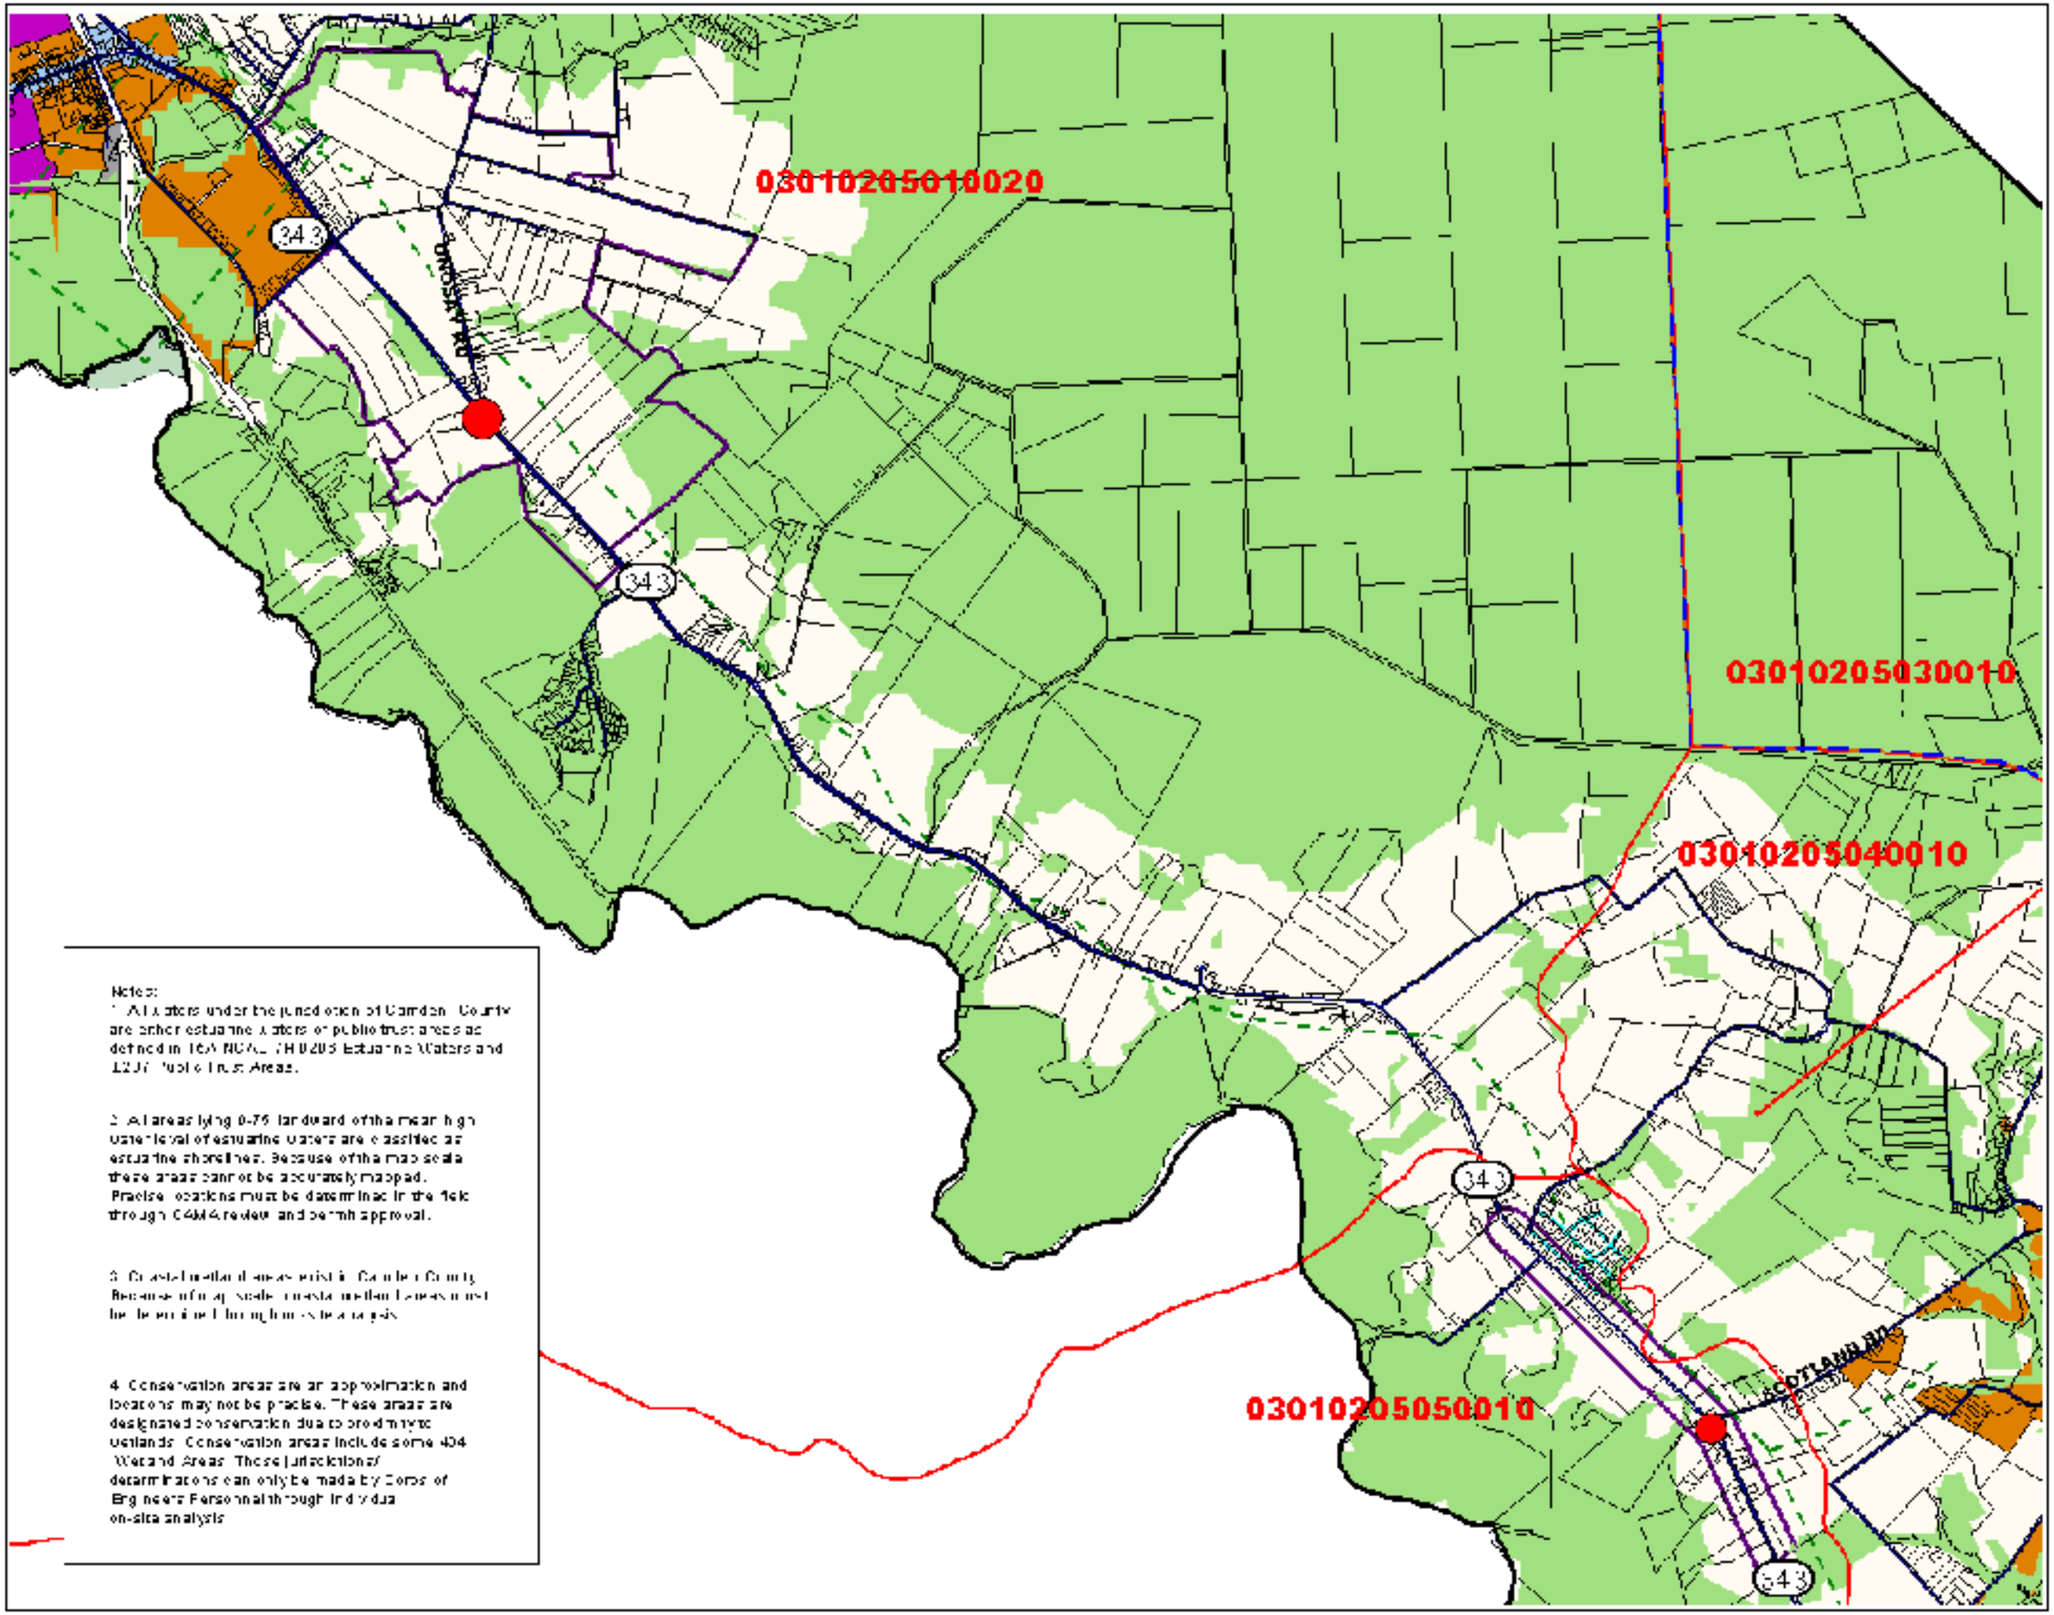
MAP 34

Camden County Land Use Plan

Highway North 343 Corridor Study Area

Future Land Use



Notes:

1. All waters under the jurisdiction of Camden County are either estuarine waters or public trust areas as defined in 15A NCAC 7H.0205 Estuarine Waters and 15A NCAC 7H.0207 Public Trust Areas.

2. All areas lying 0-75 landward of the mean high water level of estuarine waters are classified as estuarine shoreline. Because of the map scale these areas cannot be accurately mapped. Precise locations must be determined in the field through CAMA review and permit approval.

3. Coastal wetland areas exist in Camden County. Because of map scale coastal wetland areas must be determined through on-site analysis.

4. Conservation areas are an approximation and locations may not be precise. These areas are designated conservation due to predominate wetlands. Conservation areas include some 404 Wetland Areas. These jurisdictional determinations can only be made by Corps of Engineers Personnel through individual on-site analysis.

Legend

Future Land Use

* Camden County has no existing sewer lines.

*The orange and blue cash line represent the shared boundary between Subbasin 03-01-50 and Subbasin 03-01-64.
