
Notes
1. All waters under the jurisdiction of Camden County are either estuarine waters or public trust areas as defined in 15A NCAC 7H.0206 Estuarine Waters and .0207 Public Trust Areas.
2. All areas lying 0-75' landward on the mean high water level of estuarine waters are classified as estuarine shorelines. Because of the map scale these areas cannot be accurately mapped. Precise locations must be determined in the field through CAMA review and permit approval.
3. Coastal wetland areas exist in Camden County. Because of map scale, coastal wetland areas must be determined through on-site analysis.
4. Conservation areas are a rapproximation and locations may not be precise. These areas are designated conservation due to proximity to wetlands. Conservation areas include some 404 Wetland Areas. Those jurisdictions/determinations can only be made by Corps of Engineers Personnel through individual on-site analysis.
